Flashcards — Reduced Version 1
Before you start 2

All formats and ZIP downloads are listed on the **student home page**.

PDF versions

Complete module PDFs contain the extended lessons and available exercises. Use the clickable contents and bookmarks to move between topics. Modules 6 and 7 currently contain planned overviews only.

Module	Complete PDF
1. Introduction to R	Open Module 1
2. Data and descriptive statistics	Open Module 2
3. Probability and distributions	Open Module 3
4. Sampling and estimation	Open Module 4
5. Hypothesis testing and group comparisons	Open Module 5
6. Regression (planned overview)	Open Module 6
7. Forecasting and applied analysis (planned overview)	Open Module 7

Flashcards — Reduced Version

Reduced teaching slides summarize Modules 1 and 2 in lesson order. They contain explanations, examples, and R practice; their page counts are slide counts. The separate book chapter flashcards use a question page followed by an answer page.

Review material	Browse PDF
Module 1: Introduction to R — reduced slides	Open PDF
Module 2: Descriptive statistics — reduced slides	Open PDF
Basic Business Statistics, 13th edition, Chapter 1 — 50 recall cards / 101 pages	Open PDF

Download all reduced review PDFs. Book chapter guides and source limitations are listed separately. Editable PowerPoints stay with the instructor.

Before you start

Reading HTML or PDFs needs no R installation. Running and editing the R examples requires R, RStudio, and Quarto. Package installation needs internet access; the teaching CSVs are already included. HTML rendering does not require Python or LaTeX. Open the project, run `setup.R` once, then open a lesson or exercise and click **Render**.

The student project includes the files needed for the active lessons. Instructor answers, local textbook PDFs, original publisher workbooks, and original instructor measurement workbooks are excluded. References to these original sources document provenance; they are not missing student dependencies.

Keep attribution and source notices with shared copies. Textbook excerpts and third-party data retain their original rights.

Return to the course home.
